

MICHAEL MBUGUA

Senior Software Engineer

Nairobi, Kenya | +254 708 453 901 | michaelmbugua.me@gmail.com | linkedin.com/in/michael-mbugua-5b849b6 | github.com/colmike | colmike.github.io

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of professional experience across frontend and full-stack development for enterprise and client-facing web applications. Strong engineering fundamentals in Angular, TypeScript, JavaScript (ES6+), and Java/Spring, with hands-on experience in RESTful APIs, GraphQL, containerization (Docker, Kubernetes), and cloud platforms (AWS, Azure). Proven ability to design component architecture, enforce test strategy (Jest/Vitest, 95%+ coverage), and deliver production code through CI/CD pipelines (GitLab CI/CD, Azure Pipelines). Comfortable working independently in distributed, remote-first teams, collaborating with international stakeholders, and quickly picking up new frameworks and languages to meet project needs.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS/SASS, RxJS, NgRx, Tailwind, Bootstrap, Angular Material, PrimeNg

Backend & APIs: Java, Spring / Spring Boot, RESTful APIs, GraphQL, WebSockets

Cloud & DevOps: Docker, Kubernetes, AWS, GitLab CI/CD, Azure Pipelines, Git, GitHub, GitLab

Testing & Quality: Jest, Vitest, unit/functional test design, SonarQube, code review

Practices: Agile/Scrum, component-based architecture, design patterns, accessibility and responsive design, cross-functional collaboration

PROFESSIONAL EXPERIENCE

Front-End Software Developer (Angular)

August 2025 – Present

Equity Bank, Kenya

- Ensured development passed through a CI/CD pipeline on Azure Repository, applying engineering standards and security checks, including automated package vulnerability scans and tests before build and deployment.
- Contributed to software design decisions for Equity Online's Save and Invest functionality, evaluating implementation trade-offs with backend developers and product owners, and applying strong engineering principles and design patterns.
- Wrote Jest and Vitest test cases for every feature delivered, a mandatory CI/CD gate, achieving 95%+ code coverage.
- Delivered UI implementations validated by QA against Figma designs for visual accuracy and usability.
- Conducted code reviews for 3-4 engineers weekly, maintaining consistent code quality standards.
- Collaborated in agile, cross-functional teams with backend developers, DevOps, and product owners in a continuous delivery environment.

Front-End Software Developer (Angular)

March 2022 – August 2025

Eclectics International

- Ensured development passed through a CI/CD pipeline on GitLab, incorporating vulnerability checks and SonarQube reviews before build and deployment.
- Designed and built Angular applications and reusable components against client requirements and functional/non-functional constraints, applying software design best practices.
- Built a responsive Salary Advances web application with Angular and TypeScript, working directly with stakeholders to elicit and prioritize requirements.
- Delivered an Angular 18 application for Jubilee Insurance, enabling customers to access health content and track fitness progress.

- Built reusable Angular components for a multi-channel manager application spanning USSD, Internet Banking, and Mobile App access.

Full-Stack Developer (Angular / Spring Boot)

March 2021 – March 2022

Compulynx Limited, Kenya

- Built a full-stack E-Revenue web application using Spring (Java) and Angular, adopted by multiple Kenyan counties including Siaya and Baringo.
- Designed and tested a biometric solution for Post Bank Uganda supporting over-the-counter transactions and teller/field-agent sign-in.
- Contributed to a biometric system for Stima Sacco as part of a cross-functional development team.
- Worked on a biometric solution deployed for Equity Bank and KCB Kenya.
- Maintained production code, resolving client-reported defects and new requirements, and managing issue triage end to end.

Software Developer (JavaScript)

March 2019 – February 2021

M2M Systems Ltd

- Built a logistics platform tracking driver statistics (fuel, distance, time) and incidents, with management reporting.
- Built a real-time school bus tracking system transmitting live location data to parents' phones with alerts.
- Built a security management platform tracking guards, vehicles, and visitor logs, with incident reporting for fires or robberies.

EDUCATION

Bachelor's Degree in Computer Science, Second Class Upper Division — Maseno University, Kisumu, Kenya (2017)

KCSE, Mean Grade A- — Starehe Boys Centre (2012)
